

“The 2380 is the perfect example of a truly trailerable, live-aboard vessel. If you're looking for a family-based cruiser that you can tow up and down the coast, this is the boat!”

CR 2380

CR 2380

Cruise in comfort wherever the tide takes you.

Smart and sleek, the CR 2380 is a trend-setting compact sports cruiser that turns corners – and heads. The CR 2380 can be powered by either outboard or sterndrive powerplants, from 150 through to 225 horsepower. With many benefits to outboard or sterndrive power, the choice is yours!

The variable deadrise hull provides a smooth, dry ride and affords ample storage and accommodation options. A further large storage compartment runs down the starboard side of the cockpit and forms an L-shaped lounge, which converts into a double bed (when option selected) using the dinette table as an infill.

The cabin takes advantage of the CR 2380's generous beam, creating an inviting environment to relax or overnight in. The roomy cockpit flows to a moulded transom step-through, providing easy access to the boarding platform, which also acts as an alfresco balcony and fishing platform. Whittleby's CR 2380 is the big little boat, offering many of the features found in larger CR models in this mid-sized legally trailerable sports cruiser and weekend fun machine.
