

Overall, if you are thinking of stepping up into a fibreglass boat, it's a very easy boat to drive.

# SL 22

Whatever your prey, this is your weapon.

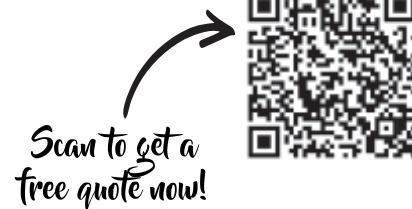

At 6.6m, the SL 22 is perfect for stalking big bays for snapper or spending long days out wide chasing tuna or marlin. Or perhaps a long haul to a distant reef floats your boat?

Whatever your prey, this is your weapon. Confident and surefooted, the SL 22 is easily towed behind a big family SUV. With the addition of the new fibreglass hard top with full length windscreen option the SL 22 is perfect for all climates. Powered by a reliable 150 horsepower outboard through to a 225 option, or sterndrive power of 250 HP. The SL 22 is the perfect match to either sterndrive or outboard power, with key benefits to both power plant styles!

The ergonomic helm layout allows the skipper to concentrate on the game at hand. A recent update is a revised standard flat level dash to accommodate large-format Simrad electronics up to 16" in size. The SL 22 can be packaged up as a deep vee warrior, to chase the big pelagics offshore, or be just as comfortable as a weekend sports boat for fun out on the water. It's for this reason, the cross over size of the SL 22 makes it one of the most popular SL models in the range and right around the country.
